

SENSIBILITY Receives manifold as "input"		UNDERSTANDING Synthesizes input: makes manifold mine			IMAGINATION Mediates S and U		REASON Manages use of U by pointing to totality		
Pure	Empirical	Pure		Empirical	Pure "productive"	Empirical "reproductive"	Pure Ideas		Empirical
Forms of Intuition	Sensation	Judgment	Category	Concept	Schema (time rule)	Schema (time rule)	Constitutive (fallacies)	Regulative (proper)	"reasoning"
Diversity Exteriority in space and succession in time	Colors Sounds Texture Smell Example: Green background Tan things Moving Leaping Roaring Bleeding	Categorical S is P S belongs to class of P	Substance / accident	"lion moves"	Permanence / alteration	"lion STAYS same and it just CHANGES position"	Subject w/o predicate Soul Paralogism	Unity of thinking subject	Making sure judgments cohere in my experience ("lions are predators, as are tigers")
		Hypothetical If S, then P Ground / consequence	Cause and effect	"lion kills antelope"	Law-succession 1st event (cause) MUST precede 2nd event (effect)	FIRST "lion leaps" THEN "kills antelope"	Series ends w/o presupp. World Antinomy	World is lawbound system enabling all science	Coordinating scientific investigation (lion biology coheres w/ ecology)
		Disjunctive S or P	Reciprocity of Agent / Patient S is cause of P AND P is cause of S	"lion kills bring forth hyenas in ecological relations"	Simultaneity of determinations of C and E	WHENEVER you see lions you will ALSO see hyenas	System w/o remainder God Ideals	Allows theoretical / practical Reason coherence	Coordinating moral duty and scientific knowledge
